

Confirmation

I hereby confirm that I have been informed about and understand the following regulations:

- Entry into Switzerland is currently very restricted due to the pandemic. The visa issued to me does not give me the right to enter Switzerland. The Swiss Embassy in Jakarta points out that the border authorities will check upon entry whether the legal requirements for entry are met.
- I am only allowed to enter Switzerland and any other Schengen country if, in addition to the visa issued to me, I have recognized proof of complete vaccination against the SARS-CoV-2 coronavirus (proof of vaccination).
- Proof of vaccination (form of proof that is customary at the time) must include the following information: Last name, first name / date of birth / dates of vaccination / vaccine used.
- In particular, I am aware that the complete vaccination must have been administered with one or more of the vaccines approved by one of the following 3 organizations
 - Federal Office of Public Health FOPH (Switzerland)
 - European Medicines Agency (European Union)
 - World Health Organization WHO (United Nations)
- I have been informed regarding the requirements for the proof of vaccination.
- I must be vaccinated according to the requirements or recommendations of the country where the vaccination was given and at least 14 days must have passed since the last required injection. The complete vaccination must be less than 12 months old.
- Proof of vaccination must be in German, French, Italian or English.
- If I cannot present a recognized proof of vaccination, I will not be allowed to enter Switzerland and will be turned back at the border. In addition, transportation companies, especially airlines, may refuse to fly me into Switzerland at all.
- If I am turned away at the border upon arrival at a Swiss or Schengen airport, the airline will send me back to the airport of departure and may charge me for the costs incurred.
- The embassy points out that a visa is no guarantee of entry, the authorities responsible for border control decide independently on entry into Switzerland.

I further confirm

1. That I have received the complete SARS-CoV-2 vaccination (according to the procedure described above) before entering Switzerland; and
2. That I will present an approved proof of vaccination (as described above) upon entry into Switzerland.
